

Focus Lutein

for Daily Eye Health

- + 1 CAPSULE A DAY
- + VEGAN & SUGAR-FREE
- + WITH MESO-ZEAXANTHIN

Clinically proven to support eye health & protect against oxidative stress.

Focus Lutein is a clinically formulated supplement designed to support and protect long-term eye health. This once-daily, sugar-free capsule combines **lutein**, **zeaxanthin**, and **meso-zeaxanthin**—three powerful carotenoids concentrated in the macula.

- Clinically proven to support visual function and help protect against age-related eye changes
- Helps filter harmful blue light and reduce oxidative stress on the eyes
- Supports sharp, clear vision

While lutein and zeaxanthin are naturally found in leafy greens and colorful vegetables, meso-zeaxanthin is not typically present in the diet and is primarily available through supplementation. Focus Lutein uses marigold-derived carotenoids to ensure consistent, high-quality dosing.

Recommend Focus Lutein as part of your patients' daily routine for proactive, long-term macular support.
